

Council Meeting of
November 16, 2010

Honorable Mayor and Members
of the City Council
City Hall
Torrance, California

Members of the Council:

SUBJECT: Public Works – Adopt ORDINANCE amending construction and demolition recycling requirements for compliance with new State Green Building Code.

RECOMMENDATION

Recommendation of the Public Works Director that City Council adopt an **ORDINANCE** amending the construction and demolition recycling requirements to comply with the State Green Building Code.

FUNDING

Not applicable.

BACKGROUND/ANALYSIS

On January 1, 2011, the new California Green Building Code becomes effective. Staff has prepared an Ordinance to incorporate these changes to the Torrance Municipal Code.

While the majority of the City's current construction and demolition (C&D) recycling program is already in compliance with the new regulations, there are a few minor changes needed, including a new requirement that 100% of excavated soil and land-clearing debris be recycled. We are also altering some language to clarify the definition of a certified facility, plan submittal requirements and types of exemptions.

With the large amount of infrastructure in our area for the sorting and recycling of C&D debris, we do not anticipate any difficulty for contactors and/or property owners to comply with these additional recycling requirements. We have attached the revised Waste Management Plan forms that the public will use.

While we need to make these amendments now for the State implementation date, staff will return with additional changes to the recycling program at a later date to better accommodate the upcoming one-stop permit counter.

Respectfully submitted,

Conversion Rates

The following conversion rates are estimates to help complete the Waste Management Plan by converting materials into tonnage format. The ranges vary widely, depending on how the materials are handled (compacted, loose, chipped, etc.). Use the conversion factors and receipts from any previous projects to help you estimate the potential amount of materials and diversion. Take into consideration the type and load of vehicles that will be used to haul the materials. Ask your hauler or recycler to assist you in estimating these numbers.
